

Cash Dash

Presented By:

Trafton Boothby, Christie Djidjev, Andrew Bell, Matthew Chesser, Seamus O'Meara

Date: 4/27/2023

The Problem Pitch

- ▶ The 350 Spectrum Warfare Wing (SWW) Financial Management (FM) Office currently needs a **comprehensive system** that provides insights into the **planning, budgeting, and execution status of the organization**.
- ▶ Requested product - Establish a **Business Management Dashboard** that collects:
 - ▶ Budget positions, funded/unfunded requirements, Commander priorities, and contract tracking/status
- ▶ Why?
 - ▶ To help decision-makers make informed decisions with allocated resources

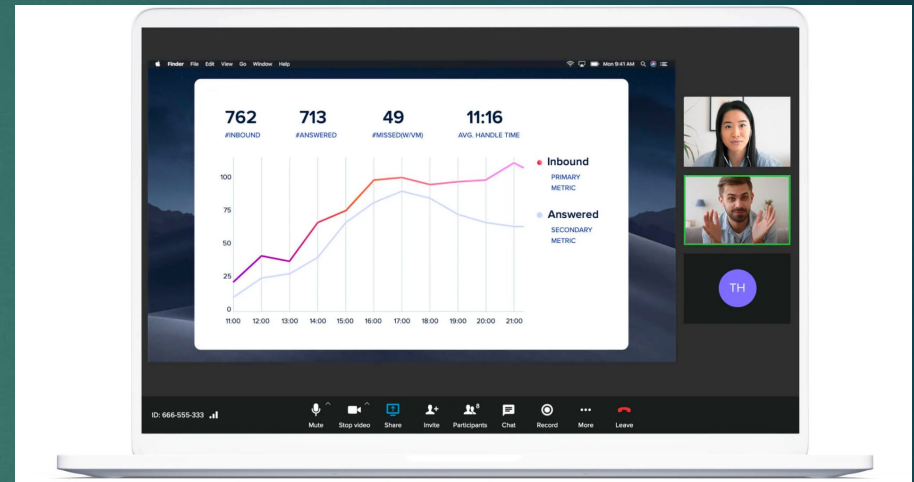

First Steps & Initial Idea

- ▶ Initial interviews + research to get familiar with FM
- ▶ Possibility of an already existing/ implemented solution
- ▶ Issues regarding ACC Dashboard
- ▶ Our pivot
 - ▶ Training
 - ▶ Collaboration

Interviews Conducted: 26

- ▶ Zoom/Teams Interviews (Avg. of 30-90 minutes each): **22**
- ▶ E-mail Correspondence: **3**
- ▶ In-Person Interviews: **1**

Interviewees included:

Jenna Hyde, Victoria Howes, John Hannah, Jerry Hernandez, Thomas Donigan, Kimberly Holder, Derek Hossbach, Trystan Link, Kermitt Francis, Christopher Orpilla, Elizabeth Roley, Joseph Clark, Breann Trager, Robin Newton, Elaine Boothby

Mentors & Their Affiliations

Mentors:

- ▶ Problem Sponsor - Victoria L. Howes, Deputy Comptroller
- ▶ Senior Leader - Jenna M. Hyde, Comptroller

Tech POCs:

- ▶ Capt John Hannah, Flight Commander, Software Development
- ▶ Christopher Orpilla, Data Officer, Contracted

A Few Key Individuals

- ▶ Key Beneficiaries
 - ▶ **Jenna Hyde** - Comptroller / Senior Leader
 - ▶ **Victoria Howes** - Deputy Comptroller / Problem Sponsor
 - ▶ They wanted a new Dashboard to fit the specific needs of each section of the 350 SWW's FM Team
 - ▶ **FM Resource Advisors (RAs)**
 - ▶ Struggles with collaboration & annoying data access permissions
- ▶ **Christopher Orpilla** - Tech Expert + Support
 - ▶ Has been a great resource for information on the systems that the SWW uses
 - ▶ Showed us how/where available data & systems could be used in our solution

Universal Market & Business Features

- ▶ A comprehensive dashboard can help financial teams to identify funding gaps, prioritize investments and make data-driven decisions
- ▶ A couple of ways it can help **save time and resources**:
 - ▶ **Real-time collaboration**, quickly identify the spending trends, inconsistencies, etc.
 - ▶ **User-based access controls** - initial permissions, no need to give/receive permissions every time
 - ▶ **Automating manual tasks**, e.g. data entry or report generation

Our Trajectory

Enthusiasm:

- ▶ Improving the 350 SWW FM office's planning, budgeting, and execution processes

Frustration:

- ▶ Late swap to new Problem (Data->Cash)
- ▶ Multiple pivots
- ▶ Scheduling

Finding Our Pace:

- ▶ Learned more about DoD practices/behavior
- ▶ Gained experience with various Microsoft tools

Settling In:

- ▶ Eventually settled on a hybrid solution pulled from our initial ideas:
 - ▶ Incorporate feedback and insight from different stakeholders
 - ▶ Leverage the practicality of Microsoft Tools

Client Feedback

“We don’t want a dashboard, we are requesting a [working, business management] tool... being able to link the PowerBI dashboard to our tool is important” - **Victoria Howes**, 3/22

“Using that tool, not reinventing the wheel, but creating our own from that” - **Jenna Hyde** 3/15

“I think you are absolutely right with that ‘cause at the end of the day, it’s about the user. It’s about what we can do to help the end user” - **Kermitt Francis**, 3/13

“I don’t want you guys to get caught in between a sales pitch and people going against each other” - **Jenna Hyde** 3/15

What did we learn from our Interviews?

- ▶ What we wanted to learn
 - ▶ What does the **data pipeline** look like? How much **time is saved**? What are the **cost/benefit/budget allocations**?
- ▶ What we learned
 - ▶ FM Workers' median salaries, converted to hourly wages for **cost/benefit** calculations
 - ▶ General/vague **data pipeline**
 - ▶ more workflow & **time-save** specifics
- ▶ How did this change things?
 - ▶ Continue testing MVP, researching requirements, creating visualizations + **Creation of a theoretical Dashboard**
- ▶ Action Items
 - ▶ More Teams and **SharePoint testing**
 - ▶ Refine MVP w/ Orpilla (Create **example dashboard** hosted on an **example SharePoint Site**)
 - ▶ Refine **budget/funding requirements** for our MVP

	KEY RESOURCES <ul style="list-style-type: none">• Christopher Orpilla• John Hannah• Jenna Hyde<ul style="list-style-type: none">◦ For approval and access• Operations and maintenance funds (O&M)• Someone/something to train FM		DEPLOYMENT <ul style="list-style-type: none">• Integrate data into Power Apps for collaboration• Testing within Power Apps to ensure functionality• Transition current FM members into utilizing Power Apps instead of the current systems		
MISSION BUDGET/COST <ul style="list-style-type: none">• Labor Cost:<ul style="list-style-type: none">◦ Development phase cost: \$18,605◦ Implementation phase cost: \$18,605◦ Maintenance phase: \$97,536• Hard and Soft costs:<ul style="list-style-type: none">◦ Year one: \$20,536◦ Year two: \$14,136◦ Year three: \$14,136			MISSION ACHIEVEMENT/IMPACT FACTORS <ul style="list-style-type: none">• FM Leadership will be able to efficiently collaborate with the rest of the FM wing members within already existing programs the FM has access to.<ul style="list-style-type: none">◦ This results in cutting out a big portion of time being wasted on the process of sending spreadsheets, documents, etc. between the FM team and FM leadership		

What we did initially

- ▶ We focused on discovering more about their current dashboard
 - ▶ Using that information to create a new dashboard focused specifically on the 350th SWW
- ▶ Role-based access implementation
- ▶ Hiding/showing prioritized data
- ▶ Filter options that were more user friendly

Initial MVP

- ▶ MVPs for the week:
 - ▶ Possibility of Power BI Dashboard UI element implementation on SWW Power BI Dashboard
- ▶ What is the MVP testing?
 - ▶ Possibility of time-saves from changes in UI regarding: Navigation, user-input, role-based access, and hiding/showing prioritized data
- ▶ What data was expected?
 - ▶ Dashboard with filter options
- ▶ What data was received?
 - ▶ Dashboard with filter options available (but possibly not utilized)

Current MVP Overview

- ▶ Power Automate (PA) allows for automatic responses to events.
 - ▶ Creation/modification of key files can trigger a notification to key persons.
- ▶ PA can be used to link directories.
 - ▶ Link a Page on Sharepoint to a Channel on Teams.
 - ▶ Link a List to an email (group or individual).
- ▶ PA allows for virtually any process to be automated.
 - ▶ Events (called Flows) can be scheduled, automatic, instants, etc.
 - ▶ You decide the frequency of Flows, and the processes executed.

Power Automate has many premade flows that interact with SharePoint to choose from.

You can also create your own custom flow to suit your specific needs.

Create a CSV file for items in a SharePoint list on a recurring basis

Refresh SharePoint list items from SQL Server on a recurring basis

Track new files in an Excel Online (Business) spreadsheet

Post Adaptive card to Teams when new item is created in SharePoint List

Save attachments to a SharePoint when an email arrives to a Groups mailbox

Create a file in SharePoint for attachments created or modified in a list

Extract entities of received emails using AI Builder

Export SharePoint list items to File System in CSV format and send an email

Save classroom walkthrough data

Post message to Teams when New file is created to SharePoint folder

Track new OneDrive files in Excel Online (Business) spreadsheet

Delete OneDrive(Business) files older than five days and send email daily

Check PowerBI alert status and send an email on a recurring basis

Create SharePoint item for Excel Online(Business) worksheets on daily basis

Create a new page in OneNote when a Microsoft Form is submitted

Create a SharePoint item when Office 365 calendar event is submitted

When an item is created or modified -> Post a choice of options as ...

PA Links to Sharepoint

When an item is created or modified

Our Conclusions

- ▶ More user-friendly process and front-end
 - ▶ Our MVP shows an example of what a more user-friendly and efficient implementation would look like (Teams/Sharepoint/Power Automate)
 - ▶ Power Automate would streamline the process of managing files across different applications and platforms.
- ▶ FM's data processing/collaboration issue
 - ▶ Microsoft Teams alleviates multiple time consuming processes
 - ▶ Teams provides quick links to folders, applications, and directories.
